Green Revenues Data and Indexes

Capturing the transition to a green economy

FTSE Russell's **Green Revenues (LCE) data model** and **Green Revenues Index Series** track companies that generate green revenues – a critical component missing from current sustainability models. Now, investors can accurately identify and support their investment in companies that are engaged in the world's transition to a green economy with consistent, transparent data and indexes.

About the Green Revenues data model

The **Green Revenues (LCE) data model** is designed to measure the revenue exposure of public companies engaged in the transition to the green economy and allows you to design, build and analyze your portfolios, baskets or indexes with this measure in mind.

About the Green Revenues Index Series

The **Green Revenues Index Series** provides investors with indexes capturing managed exposure to companies with revenues from green goods, products and services. The ten indexes cover key FTSE and Russell benchmarks:

- FTSE All-World Green Revenues Index
- FTSE Developed Green Revenues Index
- FTSE Emerging Green Revenues Index
- FTSE Asia Pacific Green Revenues Index
- FTSE Europe Green Revenues Index
- FTSE All Share Green Revenues Index
- FTSE China Green Revenues Index
- Russell 1000, 2000 and 3000 Green Revenues Indexes

Data features

13,400 public companies

The data model covers nearly 98.5% of the total global market capitalization capturing over 13,400 public companies.

2,400 companies generating green revenues

Over 2,400 companies have been identified as engaging in green activities from one or more of the 60 green industrial (LCE) subsectors.

60 LCE subsectors

Individual goods, products and services are passed through a unique test of green industrial utility to identify their LCE eligibility. If they successfully pass the test of utility they are then mapped to one of 60 LCE subsectors.

7 years of green revenues

A detailed 7 year corporate financial history dating back to 2008 allowing users to analyze the structural shift to a green economy across public companies.
